influxdata
Act in Time

IoT Center Workshop InfluxDB

Miroslav Malecha / Product Manager
Bonitoo.io

Agenda

- What is **InfluxDB**?
- **IoT Center Demo** Application
- **Install** IoT Center
- Build InfluxDB data **queries**
- InfluxDB **JS Client** library introduction
- Add **geo widget** into Node.js application
- InfluxDB as **monitoring** platform for Node.js

InfluxDB
Time Series Platform

EMPOWERS DEVELOPERS TO BUILD IOT, ANALYTICS, & MONITORING SOFTWARE.

- Purpose built to handle the massive volumes of time stamped data
- Easy to share, easy to extend
- Multi data source
- Open Source (MIT license)
- Easy to get started but powerful to scale

Powerful APIs, Tools, & Ecosystem

Developers using the InfluxDB platform build their applications with less effort, less code, and less configuration.

Unrestricted developer productivity

Client and server libraries in everything from React, JavaScript, Go, Python and more.

Vibrant open source community

A diverse and highly motivated community, making contributions in code, & documentation.

Get a head-start with templates

Inspiring templates for every use case. Easy to create and share — find what's right for you.

Powerful & active ecosystem

200+ Telegraf plugins, integrations with Grafana or data sources like Google Bigtable.
